Professional Summary

Highly motivated, self-starting developer. Familiar with building web applications and development processes. A fast learner looking to continually learn and improve my skills in creating high-quality software. Eagerly anticipating to work collaboratively as well as leading projects in the future. Below you'll find projects I've completed that showcase my skills and general background in developing software.

Skills

Languages: HTML, CSS, JavaScript, TypeScript
Technologies: React.js, Redux, Material UI, Bootstrap, Github

Relevant Projects

GoldsGym (demo)

React.js, Material UI, REST API

- Built and deployed a fitness app using **React**, **Material UI**, **RapidAPI**, **Netlify** and third-party libraries (react-horizontal-scrolling-menu & react-loader-spinner)
- Built **reusable components** with the functionality to choose exercise categories and specific muscle groups.
- Used **async await** to fetch and display more than one thousand exercises with practical examples and youtube videos from RapidAPI (ExerciseDB & Youtube Search and Download)
- Used **React hooks** to manage states and **React Router** for page navigation.

Yummy Cart (demo)

React.js, TypeScript, Bootstrap

- Built and deployed a food shopping cart app using **React**, **TypeScript** and **Bootstrap**.
- Used **React context** to manage state and functions globally.
- Built **reusable components** to increase efficiency.

Forkify (demo)

Javascript

- Forkify is a recipe finder app built using **HTML**, **CSS** and **JavaScript**.
- Files structured using the **MVC** architecture.
- Used **async await** to fetch and display recipe data.
